

Description page

Investment Objective

The investment objective of the portfolio is to achieve a reasonable level of current income and seek to preserve capital in real terms (after inflation), with low to moderate volatility over the medium to long term.

The portfolio return objective is to outperform inflation (CPI) with 3% over a 3 year rolling period with no negative growth over a 12 month rolling period. Please note this is not a guaranteed portfolio.

The portfolio aims to maintain above average performance on a risk-adjusted return basis, against all listed South African Multi Asset Low Equity unit trust funds.

Investment Mandate

The Portfolio is broadly diversified across all asset classes and sectors and is fully managed with an absolute return orientation. Investments may be concentrated in specific securities or themes and the asset allocation may reflect increased equity exposure within the specified constraints. However, a flexible approach is adopted in the investment process. The investment has a defensive asset allocation feel towards domestic and international asset classes.

The portfolio complies with Regulation 28 of the South African Pension Fund Act, which limits exposure to certain asset classes, as stipulated below.

Asset Class	Parameters	Long-term Strategic Allocation
Domestic Cash	25% - 100%	30%
Domestic Bonds	0% - 100%	25%
Domestic Property	0% - 25%	5%
Domestic Equity	0% - 40%	20%
Offshore Investments	0% - 25%	20%

Investor Profile

The portfolio is suitable for:

- Investors who want to protect long-term retirement capital in real terms within a retirement investment vehicle, including retirement annuity funds, living annuities, provident and preservation funds.
- Investors seeking a defensive investment solution that would allow them to draw a reasonable level of income coupled with a strong focus on capital preservation in real terms.
- Investors with a low tolerance for the volatility of returns associated with equity investing.
- This fund is not suitable for investors seeking a vehicle that aims to aggressively accumulate capital.
